SUMMARY

Computer Science Engineering student with hands-on experience in React, JavaScript, and modern frontend development. Built data visualization platforms handling 55,000+ rows and secured Runner-Up position in AI Verse Hackathon 2026. Passionate about creating scalable web applications and user-centric interfaces.

ACHIEVEMENTS

AI Verse Hackathon – Runner Up February 2026

- Secured **Runner-Up position** in the AI Verse Hackathon organized by upGrad in Bengaluru.
- Worked in a team to design and present an innovative AI-based solution within a limited time frame.

NMIT Hacks 2026 – Render Track Winner March 2026

- Won **2nd Prize** in the Render Track at NMIT Hacks 2026, a 48-hour hackathon at Nitte Meenakshi Institute of Technology, Bengaluru, earning \$800 in Render credits.

Smart India Hackathon & VIBE-A-THON – Participant Sep 2025, May 2026

- Participated in Smart India Hackathon (Internal Round, AMC Engineering College) and VIBE-A-THON 2026, a 24-hour hackathon at Nitte Meenakshi Institute of Technology, Bengaluru.

PROJECTS

Dashify – No-Code Data Visualization Platform [Live Project](#) | 2026

- Developed a React-based platform for converting CSV and Excel data into interactive dashboards.
- Implemented dynamic chart generation and dark mode support.
- Optimized rendering performance for datasets exceeding 55,000 rows.
- Deployed application using Vercel.

BlogSeek – Multi-Source Blog Discovery Platform [Live Project](#) | 2026

- Built a responsive multi-source blog discovery platform with **Next.js**, **TypeScript**, and **Framer Motion**, letting users search technical articles from DEV.to, Hashnode, and Hacker News through one unified interface instead of browsing each site individually.
- Engineered a scalable REST/GraphQL integration layer normalizing differing API responses into a common data model, fetching sources concurrently with **Promise.allSettled()** and de-duplicating articles before rendering.

EDUCATION

2023–2027 **AMC Engineering College, Bengaluru**
Bachelor of Engineering in Computer Science and Engineering (Data Science)

2023 **Kendriya Vidyalaya MEG & Centre, Bengaluru**
Class X & XII

SKILLS

Programming Languages	JavaScript, TypeScript, Python
Framework and Libraries	Next.js, React.js, Node.js, GSAP, Framer Motion
Web Technologies	HTML, CSS, Tailwind CSS
Databases	MySQL, MongoDB
Tools & Platforms	Git, GitHub, VS Code, Postman, Vercel
